

Gujarat Technological University
B.Pharm Semester-I

Human Anatomy Physiology and Health Education- I

Theory (3 Hours / Week: 3 Credits: 45 hours)

1. **Introduction and Scope** of Anatomy and Physiology. Structural and functional organization of various organ systems. Definitions of various terms used in Anatomy **02hrs**
2. **Structure and function of cell** and its components with Special emphasis on molecular structure of cell membrane, transporter mechanisms, mitochondria and nucleus. Cell cycle and its significance. Mechanism of protein synthesis by cell organelles **05hrs**
3. **Elementary tissues of the body.** Various elementary tissues and their subtypes: epithelial tissue, muscular tissue, connective tissue and nervous tissue. **03hrs**
4. **Osseous system:** Structure and function of skeleton. Histology of bone Classification of joints and their function. Joint disorders. **04hrs**
5. **Muscular system:** Gross anatomy of skeletal muscles. Names, position, attachments and functions of various muscles. Neuromuscular junction. Physiology of muscle contraction and its components. Properties of skeletal muscles and their significance in health disorders. **05hrs**
6. **Haemopoietic system:** Composition and functions of blood and its components. Blood groups. Mechanism of blood coagulation. Haemopoiesis. Brief information regarding disorders of blood. **06hrs**
7. **Lymph and lymphatic system:** Composition, Formation, and circulation of lymph. Extra-cellular, Tran-cellular and intra-cellular fluids and their composition. Basic physiology of spleen and serosal cavities. Disorders of lymphatic system. **03hrs**
8. **Cardiovascular System:** Anatomy of the heart, Circulatory system including Arterial and Venous system with special reference to the names and positions of main arteries and veins, Properties of Cardiac muscle, Electrocardiogram (ECG), Blood pressure and its regulation, Coronary circulation, Basic understanding of Cardiac cycle and Heart sounds, Renin Angiotensin system and its significance, Cardiacoutput, Brief introduction to cardiovascular disorders. **09hrs**

9. **Body defense Mechanisms & Immunity:** Basic principles of immunity, innate immunity, adaptive immunity, immune interactions, immunotherapy, acquired immunity, Reticulo- endothelial System. **03hrs**
10. **Digestive system;** Gross Anatomy of the Gastrointestinal tract. Structure and functions of various organs of alimentary canal and associated organs like Liver, pancreas and gall bladder. Physiology of digestion and absorption. Brief overview of disorders. **05hrs**

Human Anatomy Physiology and Health Education-I
Practicals
(2 Hours / Week: 2 Credits)

1. Study of the human skeleton with the help of charts and models **02hrs**
2. Study of the human cardiovascular (Heart, Arterial & Venous System), Digestive and Muscular System with the help of charts and models **04hrs**
3. Histology of elementary tissues and various organs of above mentioned Systems **02hrs**
4. Hematology experiments **18hrs**
 Use & Care of Microscope
 Study of Haemocytometry
 Hemoglobin estimation
 Total WBC count
 Total RBC count
 Differential WBC count
 Determination of clotting time and bleeding time of blood,
 Erythrocyte sedimentation rate (ESR) and Blood Groups Effect of
 Osmosis on RBC
5. Determination of pulse rate, blood pressure, listening to heart sounds, demonstration of ECG **02hrs**
6. Amphibian Experiments for Study of Properties of Skeletal Muscle using either demonstrations or computer simulated experiments **02hrs**

Books Recommended (Latest Editions)

1. William J. Larsen: Anatomy – Development, function, Clinical Correlations– Saunders (Elsevier Science)
2. Guyton A.C. and Hall J.E. : Textbook of Medical Physiology – 10th Edition– W. B. Saunders
3. Seeley R. R., Stephens T. D. and Tate P.: Anatomy and Physiology 2000– McGraw Hill Co.
4. Waugh A. and Grant A.: Ross and Wilson’s Anatomy and Physiology in Health & illness — Churchill Livingstone
5. Sobotta : Atlas of Human Anatomy (2 Volumes) –Edited by Putz and R. Pabst, Lippincott, Williams and Wilkins
6. Anne M. R. Agur & Ming J. Lee: Grant’s Atlas of Anatomy –Lippincott, Williams and Wilkins
7. Gosling T. A., Harris P. F., Whitmore I., William, Human Anatomy: Color Atlas and Text — Mosby
8. Bullock B.L. & Henze R.L., Focus on Pathophysiology –Lippincott
9. Martini F. Fundamentals of Anatomy and Physiology (Prentice Hall)
